The Shaping Digital Classes Learning Platform

DEVELOPMENT OF 3 COURSES FOR IMPROVING DIGITAL COMPETENCES

Over the last year, the Shaping Digital Classes Erasmus+ Partnership has been working on creating 3 courses for language teachers to improve their digital skills.

Course 1 contains tutorials and assessment instruments that promote the DigCompEdu Framework among language trainers teaching migrants and focuses on the 4 core areas: Digital Resources, Teaching, and Learning, Assessment, and Empowering Learners.

Course 2 includes several interactive modules and video tutorials for language trainers with elementary digital competences.

Currently, we are working on developing **Course 3,** which is designed for language trainers (specially migrant language trainers) with an intermediate mastery level in digital competences for teaching.

A TRANSNATIONAL PARTNERSHIP DURING THE COVID PANDEMIC

The partnership is actively working on the development of the course materials and collecting feedback. All the course materials are being uploaded to our online learning platform, which will be made available soon.
